Re: LEE HARVEY OSWALD, aka
13 - R - CUBA

File # 105-82555-4468X
Lab. # D-455927 HO
IC 81827 CF, BX

Examination requested by: President's Commission (7-7-64)

Examination requested: Photographic-Spectrographic-Microscopic

Date received: 8-6-64

Result of Examination: Firearms

Examination by: Shaneyfelt

8/10 R Frazier

Barely discernable smearing of - no groove or visible indentation. No chipping. Not pointed bullet.

Specimens submitted for examination

Request for location and examination of mark on curbing at assassination site

Curb -- Minor disturbance at L to edge.

If - if lead - cutting present it could have originated from the core portion of a metal jacketed bullet - such as C 1, 2, 3, a automobile wheel balancing weight or some other source. If lead. The absence of copper-alloy bullet jacket evidence precludes the possibility that the mark was made by a commercial full metal jacketed bullet. Further the damage to the curbing would have been much more extensive if a rifle bullet such as C 1 - 3 had struck the curb without first striking some other hard

2-FBI, Dallas (100-10461)

D-455827 HO
HC 81827 CE. 81

[illegible] curbing [illegible] was removed on 8-5-64 and [illegible] to Grail at the FBI Lab. has been designated C 3 21. [illegible] laboratory.

Small foreign metal smears were found [illegible] adhering to the curbing section at an area which bears a mark. These metal smears were [illegible] spectrographically determined to be essentially lead with a trace of antimony. No copper was found.

The lead could have originated from a lead bullet, the lead core of a metal jacketed bullet [illegible] such as the type of bullet [illegible] fired from a 6.5 mm Mannlicher-Carcano cartridges [illegible] or from some other source having the same composition.

The [illegible] absence of copper precludes the possibility that the mark on the curbing section was made by an unmutilated full jacket military type full metal jacketed bullet such as the bullet recovered from Governor Connally's stretcher, [illegible] or the bullet [illegible] or bullets represented by the jacket fragments, C2 and C3, found in the Presidential limousine. Further, the damage to the curbing would have been much more extensive if a rifle bullet had struck the curbing without first having struck some other object.
